

J.P. Morgan Asset and Wealth Management Challenge

2025 J.P. Morgan Asset and Wealth Management Challenge Case Study

Assume that you are a team of Investment Specialists representing J.P. Morgan Asset Management and Private Bank responsible for providing portfolio management and advisory services to clients across a variety of asset classes. Your responses must strictly follow the guidelines on Submission of Materials and Presentations as stated in the 2025 J.P. Morgan Asset and Wealth Management Challenge (AWMC) Information Kit and Competition Terms and Conditions and Rules.

- For the Video Submission, you will be given 10 minutes to record your response to the task.
- Please do a brief introduction and summarize your views and recommendations to Jessica according to the case provided.
- The Video Submission will need to feature all members of the team. Only one attempt is allowed.

Guidelines for the presentation is elaborated below:

The PowerPoint presentation (“Presentation” and to be submitted in Adobe® PDF format) must:

- include one (1) cover slide, one (1) agenda slide, and in addition no more than ten (10) slides on standard PowerPoint Slides. Any appendices will be counted towards the page limit. The presentation must not exceed twelve (12) slides (excluding Bibliography) in total.
- include the following information on the cover page:
 - Team Name (as submitted at registration)
 - Name and anticipated graduation year of each team participant
 - Date of Submission;
- be named according to file naming specifications:
 - “(Country)_(Team Name)_Presentation_First Round.pdf”
- contain only publicly available information: All publicly-sourced information must be properly cited in the Bibliography page to be included in the Executive Summary (see below);
- be the original work of the Team Members; and
- be submitted through the instructions shared via email to the Team Captains by the deadline established when the case is released.

J.P. Morgan Asset and Wealth Management Challenge

Guidelines for the written report is elaborated below:

The written report (“Executive Summary” and to be submitted in Adobe® PDF format) must:

- be no longer than one (1) page on A4 sized paper (210mm × 297mm, 8.27” × 11.69”) with no more than 600 words, and not inclusive of the front cover and Bibliography;
- include the following information on the cover letter:
 - Team Name (as submitted at registration);
 - Name and anticipated graduation year of each team participant;
 - Date of Submission;
- be named according to the below naming convention:
 - “(Your Competition Location)_(Your Team Name)_Executive Summary.pdf”
- contain only publicly available information: All publicly-sourced information must be properly cited in the Bibliography;
- be the original work of the Team Members; and
- be submitted through the instructions shared via email, by the deadline established when the case study is released.

All submissions (Presentation, executive summary, and video) must be submitted by **August 17, 2025 (11:59 PM HKT/SGT)**.

J.P. Morgan Asset and Wealth Management Challenge

Background

Jessica is the founder and CEO of QuantumNet AI, an AI and internet technology company based in Singapore. At 50, she has dedicated her career to advancing artificial intelligence and internet technologies and has successfully led her company through several funding rounds, culminating in a public listing on the New York Stock Exchange in March 2022. As a result of the IPO, Jessica's net worth has significantly increased, with her holdings in the company valued at US\$300 million as of December 2024.

Jessica remains committed to her role as CEO post-IPO. The company's stock enjoyed a significant rally in 2024. Jessica liquidated US\$100 million worth of shares in the same year. After peaking in January 2025, the stock saw a significant downturn, and the stock price has remained volatile since then. Jessica has expressed concern over the emotional swings caused by these market fluctuations. Currently, QuantumNet AI's market cap is US\$ 20 billion.

Her Family

Jessica is married to Alex, a 53-year-old environmental scientist. They have two children: Lucas (22 years old), and Mia (18 years old). The family's annual expenses were estimated at US\$500,000 in 2024, with expectations of an increase as they plan to support their children's education at top universities. Jessica envisions securing a prosperous future for her children by setting aside US\$10 million for each of them, to be gifted when they reach the age of 30. Both Alex and Jessica share a passion for sustainability. They have been actively involved in various environmental initiatives, donating US\$100,000 annually to related causes.

Proposal to Jessica

Jessica has successfully opened a personal name account with you and completed all required paperwork. She has also indicated her desire to fund the account with US\$100million of the proceeds from the stock sale. Jessica seeks to grow her assets with appropriate risk management. She has specified an annualized return target of at least 6.0% with 10-15% volatility, maintaining a long-term investment horizon. Despite a relatively high risk tolerance, Jessica is mindful of market fluctuations and desires a portfolio that can endure economic downturns while achieving her goals.

You have an upcoming meeting with Jessica to present and discuss a proposal that will help her meet her various goals. During the discussion, she would like you to address the following considerations:

J.P. Morgan Asset and Wealth Management Challenge

- Construct a portfolio that can meet her investment and wealth goals while providing sufficient income to meet her family's annual expenditure and philanthropic desires.
- Jessica only has investment experience in equities and fixed income but is open-minded to investing in other asset classes should they be attractive. Given her active involvement in her business, she has limited time to manage her investment portfolio on a daily basis, and thus, prefers to entrust her assets to professional fund managers.
- Jessica still holds US\$200m of her company's stock and does not plan to sell those shares in the near future.

J.P. Morgan Asset and Wealth Management Challenge

Your Task:

With some investment experience, Jessica understands the importance of diversification and asset allocation. However, she is not sure how she can construct a strategic asset allocation while ensuring a high probability of achieving each of her goals. As Jessica's advisor, please come up with an investment proposal that can meet her wealth and investment goals.

In crafting your response to the above tasks, please feel free to include, if deemed appropriate, any of the items below (not exhaustive nor compulsory) which you may want to talk to Jessica about:

- Her needs and goals as well as any assumptions made
- Strategic asset allocation
- Risk and return analysis/ projections of the portfolio
- Cashflow projection
- Macroeconomic and market update
- Fund selection criteria
- Wealth/legacy planning considerations
- Any other relevant talking points

Notes:

- You are encouraged to use funds or ETFs within the provided fund list in crafting your recommendation.
